

Resco Inspections on RealWear

Conquer the next generation
of innovative work experiences

Enable workers to complete inspections, follow guides, or call for support in hands-free or hazardous environments using only their voice with the new Resco app natively available on the RealWear HMT-1 device. Offline enabled and directly integrated with Microsoft Dynamics 365, Salesforce, or Resco Cloud.

Empower workers to stay productive anywhere. With Resco on RealWear, they can:

Access critical asset data or work instructions while keeping their hands free

Save time and effectively log data or photos to CRM without interrupting the workflow

Receive expert guidance and mitigate operational errors with Houston video calls

Check vital training information anytime they need and thus speed up onboarding

Break new ground in digitalization

- Enter an unsaturated market enabling utilization of digital tools in new scenarios
- Empower companies across industries, including manufacturing, field service, oil & gas, utilities, and more
- Create custom digital workflows using the familiar tools of Resco's Multi-experience Development Platform
- Take advantage of a unique solution on RealWear integrating various backends and support for video calls

All critical features available to workers hands-free

 Digital workflow  Work instructions  Inspections  Remote support  Photo capture  Barcode scanning
