

# How it works

Build custom mobile questionnaires

Schedule work and oversee progress of your team

Carry out an inspection or collect data on site

Dissect the data and analyze results

# Take the next step

## Get the trial

[resco.net/products/inspections](https://resco.net/products/inspections)

Go to our website and try free 30-day trial with full functionality enabled.

## Download the app

Apple iTunes

Google Play

Microsoft Store

Download the app and either use it with a trial organization, or browse through demo data. Use the QR codes above, or simply search for Resco Inspections in your app store.

## Ask us for a demo

Interested in seeing what Resco Inspections can do for you? Schedule a demo and see it in action. Contact us at [sales@resco.net](mailto:sales@resco.net)

## Follow us for updates

# Mobile forms for safer and more efficient inspections

**resco.net**  
technology on the move

# Offline-ready app for extensive use on site

- Personal calendar and route planner
- Electronic signatures
- Barcode and QR code scanning
- Photos with annotations
- Report generation
- Manuals and step-by-step guides
- Voice control

# Streamline your inspection process for smoother production of clean energy

## Reinvent the way your technicians work

Equip your team with mobile devices and help them in physically challenging conditions, such as when climbing a turbine or hanging on a rope repairing a blade.

## Work offline, onshore and offshore

Thanks to the offline mode, your technicians don't have to rely on stable Internet connection.

## Optimize processes

The data collected on site can provide valuable insights and help you make smarter business decisions.

## Increase productivity and efficiency

Exchanging paper for digital forms saves your team's time, reduces administration and eliminates errors in the field.

## Build with freedom

Design forms, surveys or to-do lists for your exact needs - including skippable sections, validation rules, and more.

## Deploy quickly

With no coding required, you can digitize your forms and deliver mobile projects within weeks.
