Mobile forms for safer and more efficient production

resco.net
technology on the move

Cross-platform app for extensive use on site

- Work in online and offline mode
- Use up-to-date templates
- Take a picture and annotate it
- Let AI image recognition help you identify models and parts
- Use tags in 3D scenes
- Scan barcodes and QR codes
- Use voice control if your hands are full
- Sign off with an electronic signature
- Generate PDF reports

Streamline your processes for smoother day-to-day operations

Real-time information from the shop floor

Keep track of what is currently happening on the shop floor with live reports and dashboards.

Ensure safety

Don't let critical information slip through the cracks. Use alerts to prevent injuries and mitigate safety risks.

Increase production quality

Ensure quality control at every stage of your production. Prevent supply chain disruptions, reduce waste and decrease end-line defects.

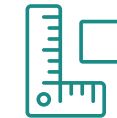

Provide fast guidance

Guide your staff through the process with step-by-step instructions and speed up employee training.

Save man hours

Exchanging paper for digital forms reduces administration and helps your staff save time each day.

Increase standardization

Standardize processes across your factories or plants to reduce losses and improve transparency and productivity.

Optimize processes

Analyze collected data to identify production obstacles, unnecessary dependencies or ineffectiveness.

Drag-and-drop form design

The easy-to-use designer enables you to digitize forms and deliver projects within days, no coding skill required.
