

Location Monitor

visualizes the situation in the field

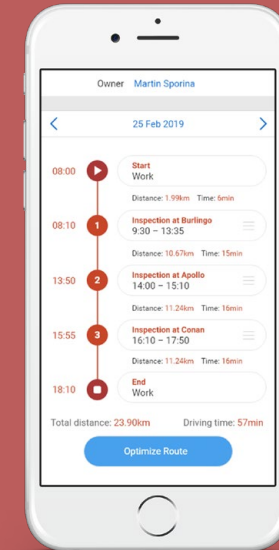

Schedule Board

for fast and effective planning

Mobile App

helps field reps manage their work travel

- **Keep track** of your teams' progress in real time
- Check previous locations and activities
- Look at **future predictions** and see who will be finishing sooner than expected

- Quick and easy drag-and-drop **appointment assigning**
- Supports **rules** and **auto-scheduling**
- Highly configurable: define your own scheduling inputs and outputs
- **Multi-user scheduling:** multiple managers or team leaders can schedule tasks for multiple field workers simultaneously

- Overview of daily agenda
- Personal **route planner**
- **Time tracking** and **timesheet management**
- Location data is sent in the background even when the app is not active
- Available for iOS and Android phones and tablets

Optimize your field operations

Plan routes for your team

Get valuable insight into the situation outside of the office

Keep track of your staff in real time and respond swiftly even to last-minute requests

A dedicated mobile app for field reps helps them organize work and finish the job on time

Location data is sent from mobile devices, so no additional GPS hardware is required

Connect to Microsoft Dynamics 365, Salesforce, or other systems
