

# Integrate Resco with Dynamics 365 Business Central

Easily connect Business Central  
with Resco products. No coding required.

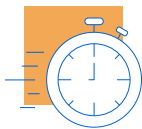

Build custom solutions with cutting edge mobile & cloud tech integrated to Business Central – using the new Resco Cloud connector for Microsoft Power Automate.

Empower clients with Resco Field Service, Inspections, Routes, and Houston solutions to cost-effectively streamline information exchange and create operational synergy.

## Enter a world of new opportunities

Cover field operations  
by pairing Resco solutions  
with Business Central

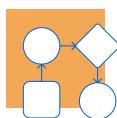

Save time and money  
by sharing key data  
between teams

Increase work efficiency,  
reduce downtimes,  
prevent errors

Keep track  
of all resources,  
even offline

Automate workflows,  
eliminate guesswork

Customize  
the user experience  
of field workers

## How the integration works

- **Connect Resco Cloud directly** with Business Central
- **Or integrate Resco Cloud with NAV** or other system in the Power Automate library
- **Give field professionals customized Resco apps**

## Use case examples

- **Create work orders in Business Central** and automatically assign them to a technician using a Resco app - with advanced knowledge management & AR calls - to complete the job
- **Log work hours, visits, material, equipment,** and other resources through Resco apps and sync the updates back to Business Central
- **Synchronize** Account, Contact, Sales Order, Work Order, Product, Material, Services, or any other entities between the field and office
- **Plan optimized routes** for your crew based on tasks from Business Central
- **Check inventory availability and generate sales orders** via a Resco app immediately in front of customers
