Mobile Sales
for Dynamics 365 Sales

resco.net

# The only mobile app that works completely offline

Equip your field sales team with the customizable all-in-one sales tool. Fully integrated with Dynamics 365 Sales.

Make sales happen with data, communication, and mobility

Spend less time and fuel on the road

Visit more customers and never run into closed doors. Route Planner calculates the fastest route you can take, considering opening hours and fixed appointments. In combination with Routes AI, it will help you spend less fuel, reduce travel time to minimum and cut costs.
Customize easily and implement changes quickly

The ready-to-use sales app offers you a high level of customization with easy implementation. Pick some of the numerous simple customization options and adjust it – implement business logic, change the design, use legally binding signatures and much more.

Work from anywhere, even when offline

There is no need to go back to the office to complete your work. With the mobile app, you can access your calendar, create reports, or get information directly in the field. Work seamlessly even with large data volumes that most sales apps cannot handle.

Don´t switch between 3rd party apps – you´ve got the whole field sales process packed into one fully customizable app

- Visit Planning & Route Optimization
- Preparation for Meeting
- Product Presentation
- To-do-list
- Checking Share of Shelves (AI)
- Orders & Invoices
- Customer Care
- Reporting
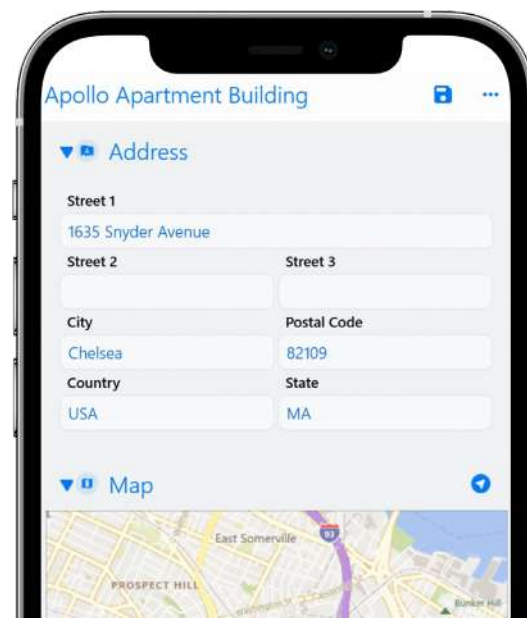

Popular features include:

- **Calendars** with all appointments and reminders so that users do not miss anything important

- **Inspections** for in-store checks in retail and FMCG verticals along with many other use cases

- **Creating signed** orders from the product catalogue and sending invoices to clients via email

- **Automatic email and phone call tracking** that saves sales reps manual work

- **Business email integration:** Exchange and Google

- **SharePoint** and major cloud storage provider integration that allows access to all materials important for your daily work

- **Interactive Map** displaying accounts, opportunities, leads, etc. and their basic information that enables users to create appointments

- **Customer visit planning** and route optimization with the current traffic situation in mind

- **Dashboard** with a clear overview of important KPIs that allows users to track their progress

- **First-class customer support** that helps you with development

- **Emphasis on security** – your device´s local storage is encrypted by default, you can set access rights, remotely lock and wipe the app if needed, or utilize Dynamics field-level security

- **Work with custom entities and large data volumes**

- **Adding legally binding e-signatures** to forms and reports the DocuSign integration

- **Iframes that allow you to include external web content,** embed web sites or custom functionalities directly in the app

Enjoy all the functionalities of the ready-to-use preconfigured sales app that you can modify to match your individual needs. Learn more at Resco Wiki.
